## Education

**•Sahyadri college of Engineering and Management - Mangalore, India** *2022-present*
*Bachelor of Engineering - Computer Science and Engineering* CGPA: 8.1

**•Holy Family Higher Secondary School Rajapuram - Kasaragod,India** *2020-22*
*Class XII/ PU : PCMC - Department of Pre-University Education, Kerala* Percentage: 83.86%

**•Holy Family Higher Secondary School Rajapuram -Kasaragod,India** *2018-2019*
*Class X - state board* 9A+,1A

## Projects

**•Quantum Machine Learning for Multimodal Depression Detection using QSVM and QNN**

*Developed a quantum classical hybrid framework integrating textual and audio modalities for early depression detection*

- Designed and implemented Quantum Support Vector Machine (QSVM) and Quantum Neural Network (QNN) models to classify depression levels, leveraging the advantages of quantum computing for high-dimensional feature learning.
- Extracted features using MFCC for audio signals and TF-IDF for textual data, enabling multimodal data fusion for enhanced prediction accuracy.
- Implemented and trained models using IBM Qiskit and PennyLane. And developed a web application that supports real-time audio recording, text upload, and depression prediction, providing an interactive and responsive user interface.

**•SOC Home Lab for Threat Detection And Incident Response using Microsoft Sentinel**

*Developed a fully functional Security Operations Center (SOC) home lab environment to simulate, detect, and investigate real-world cyberattacks using modern SIEM technologies*

- Built a multi-VM architecture using Windows 10 (victim) and Kali Linux (attacker) on VirtualBox and integrated it with Azure Log Analytics and Microsoft Sentinel for centralized log management and monitoring.
- Configured advanced Windows event logging, including Sysmon, PowerShell Script Block Logging, and Security Audit Policies to generate high-fidelity telemetry for SOC investigations.
- Simulated attack scenarios such as SMB brute force, PowerShell misuse capturing all related events within Sentinel through the Azure Monitor Agent (AMA).
- Enabled and customized Microsoft Sentinel Analytics Rules (RDP Brute Force, Suspicious PowerShell, Multiple Failed Logons, etc.) to automatically detect attack patterns and trigger alerts.
- Demonstrated hands-on SOC skills: log ingestion, event correlation, threat detection, alert tuning, attack simulation, and incident analysis—replicating real SOC operations in a controlled lab environment..

**•Fake news detection website**

*Fake news detection is a machine learning based approach to classify news articles as real or fake. The project involves data collection, preprocessing, feature extraction, model training, and evaluation to identify misleading information.*

- Tools & technologies used: Scikit-learn,Flask,Python,Pandas,CSS,Streamlit,NLTK
- Created an interactive and user-friendly interface, enhancing learning through immediate feedback

## Experience

**Python Django Full Stack Developer Intern | Luminar Technolab** *Jun 2026 – Present*
*Kerala, India*

–Developing web applications using Python, Django, HTML, CSS, JavaScript, and MySQL

–Working with Django MVT architecture, URL routing, views, models, templates, ORM, and Django Admin

–Developing REST APIs using Django REST Framework and performing CRUD operations with database integration

–Designing and managing relational databases using MySQL and writing SQL queries including joins, aggregations, and subqueries

–Building responsive web interfaces and integrating frontend components with Django backend services

–Using Git and GitHub for version control, repository management, branching, merging, and collaboration workflows

–Applying AI-assisted development tools such as ChatGPT and GitHub Copilot for coding, debugging, and code optimization

–Developing a Django-based dental clinic web application with database models, admin functionality, and backend features

**SOC Intern | Terraeagle** *Feb 2026 – may 2026*
*Bengaluru, India*

∗Monitored security alerts in a 24x7 SOC environment using SIEM tools (Wazuh, Microsoft Sentinel)

∗Analyzed logs such as Sysmon and Windows Event Logs to detect suspicious activities

∗Investigated incidents mapped to MITRE ATT&CK techniques (T1055, T1059, T1105)

∗Performed alert triage and reduced false positives through log correlation

∗Created detailed incident reports including severity, impact, and remediation steps

∗Gained hands-on experience in threat detection, log analysis, and SOC workflows
“‘latex

## Technical Skills

**Languages**: Python, HTML, CSS

**Frameworks**: Django, Django REST Framework, ReactJS, FastAPI

**Databases**: MySQL, PostgreSQL

**Web Development**: HTTP/HTTPS, Bootstrap, REST API, CRUD Operations

**Django**: MVT Architecture, URL Routing, Views, Models, ORM, Admin Panel, Authentication, File Uploads, Email Integration, Custom User Model, Django Signals

**ReactJS**: JSX, Components, Props, State, Event Handling, Hooks, Routing, Axios, Forms, Authentication Flow

**Version Control**: Git, GitHub, Repositories, Branching, Merging

**AI Development Tools**: ChatGPT, GitHub Copilot, Prompt Engineering, AI-assisted Coding, Debugging, Code Optimization

## Certificates

–**Fundamentals of Data Networking**
–**The Complete Python Bootcamp From Zero to Hero in Python**
–**Python Programming**

## Achievements / Positions of Responsibility

–**Class representative** *2022-2026*
–**Member of National Service Scheme(NSS),SCEM** *2024*
–**Bharat Scouts and Guides** *2018-19*
